Re: *RENTAL EQUIPMENT CONTRACTS – Three Years FIRM PRICES*

CMRPC has coordinated a collective bid for Rental Equipment for highway departments. The equipment on the bid included:

Excavators	Roller
Loader	Dump Trucks

Your town has been included in the blanket contracts, but you are not obligated to use these contracts when/if you need rental equipment, i.e. **they are not exclusive contracts**. Of course, the towns are responsible for all rental costs associated with the equipment's use. The bidders are not able to provide operators, only equipment. Pricing is detailed on the attached flyer.

This round is **FIXED PRICING FOR THREE YEARS**. There is no option for companies to increase their pricing in years two and three.

We feel that having these contracts in place in case you need them in an emergency is especially useful during the reporting process to FEMA. You may also want to use them to regularly supplement your highway operations.

Please have an authorized person or persons sign the attached acknowledgement and Scan/Email it to me at your earliest convenience. The contracts are available to you immediately upon our receipt of this acknowledgement form. [Email crobichaud@cmrpc.org for more information.](mailto:crobichaud@cmrpc.org) This is the first time we've put this bid together. We may do a second bid to expand the available equipment options if communities are interested.

THE ATTACHED AUTHORIZATION WILL BE GOOD FOR ALL THREE YEARS.

Thank you,

Connor Robichaud, MCPPO

Community: _____

I hereby acknowledge the terms and conditions of the **2019-2022 Rental Equipment Contract** that I received from the Central Massachusetts Regional Planning Commission (CMRPC) on April 10, 2019.

I understand that if the Town chooses to utilize any of these contracts, that we are aware of the terms and conditions including the Town's responsibility for full payment under the contract, that the CMRPC is not responsible for any costs incurred, and that the Town will take any and all measures necessary to make sure insurance coverage is in place for the rented equipment (for equipment rented without operator), and further shall indemnify the CMRPC against any damages that may occur in the course of the use of the equipment.
